

Phase 1 changes

1. Updating the technologies that are used to develop the CRM

Video alignment

2. The video will discuss all the sheets needed to be updated
3. All the signatures are cutting the text below them or not showing at all.
4. Delete empty spaces and remove blank pages

Video Functional problems

5. Forgot password it's hitting exception 'not working'
6. Clear notification is working but we need to optimize it cause when there are many notifications the site will load slower
7. Everything under: Proposals -> inspections must be too under proposals -> training
8. Proposal -> inspection -> finished "is not working"
9. Workorders -> inspection-> workorders search: after searching -> view task 'we want to add new column called "Invoice number" we can get this number from reports -> inspection -> inspection certificate search
10. Add a number that explains the count of new workers and new proposals "Figure 1"
11. Management -> Equipment -> search elevator -> view -> Elevator – highly recommendation -> page 2 -> when typing it's not effecting the certificate.
